

(a)
Prepare for
computational trust
analysis of DSPG

(b)
Determine nesting
levels of all edges,
and find every PPS

(c)
Select
PPS with the
highest nesting
level

If no PPS found

(d)
Compute trust
discounting for each
path in PPS

(g)
Compute trust
discounting for last
path in DSPG

(e)
Compute trust fusion
of edges that replace
paths in PPS

(h)
Completed DSPG
trust computation

(f)
Determine Nesting
level of edge that
replaces PPS
